DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 02, 2004 has been entered.

Claims 31 and 49 were amended; claims 32-38 and 41-47 remained as originally presented; claims 39, 40, and 48 were cancelled; and claims 50-52 were newly added.

Drawings

Corrected drawings must be submitted, including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) which was attached to Paper mailed on 10/22/2003, and including Figure 8 and Figures 20-25 filed on September 17, 2003 which were approved by the examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael S. Hargis (Reg. No. 42,631) on Wednesday October 27, 2004.

The application has been amended as follows:

- In claim 31, line 17, "**a**" before "**rotatable timing ring**" has been replaced by – **the at least one** --.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: None of the cited prior art alone or in combination teaches the claimed combination of a two stroke rotary piston type motor including:

" Regarding claim 1:

at least one automatically rotatable induction timing ring operatively connected to the engine housing; wherein the at least one rotatable timing ring is provided to automatically vary the induction phase of said motor in response to changes in the rotational speed of said motor.

Regarding claim 50:

at least one rotatable timing ring operatively connected to the engine housing, to automatically advance or retard the induction phase of said motor in response to changes in the rotational speed of said motor.

Regarding claim 51:

a rotatable timing ring to automatically vary the transfer phase of said motor in response to changes in the rotational speed of said motor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The IDS (PTO-1449) filed on September 02, 2004 has been considered. An initialized copy is attached hereto.
